

" MEASUREMENT MAN "

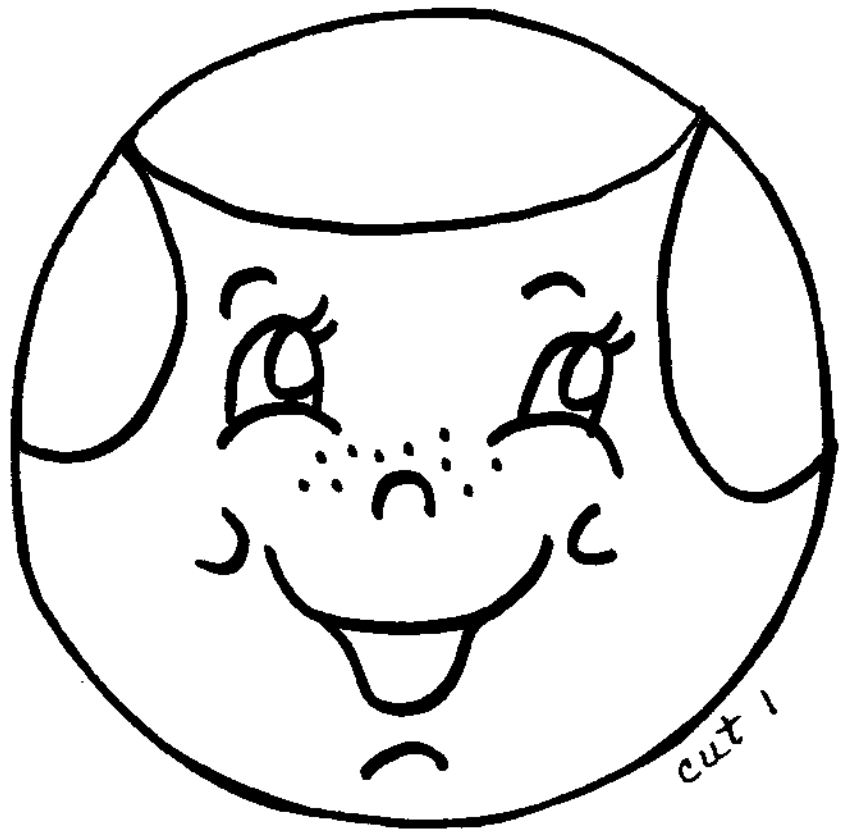

Our adorable "Measurement Man" comes to you from Joan Corbett at Mae Smythe Elementary. This is an excellent Math manipulative to help you teach your Measurement units.

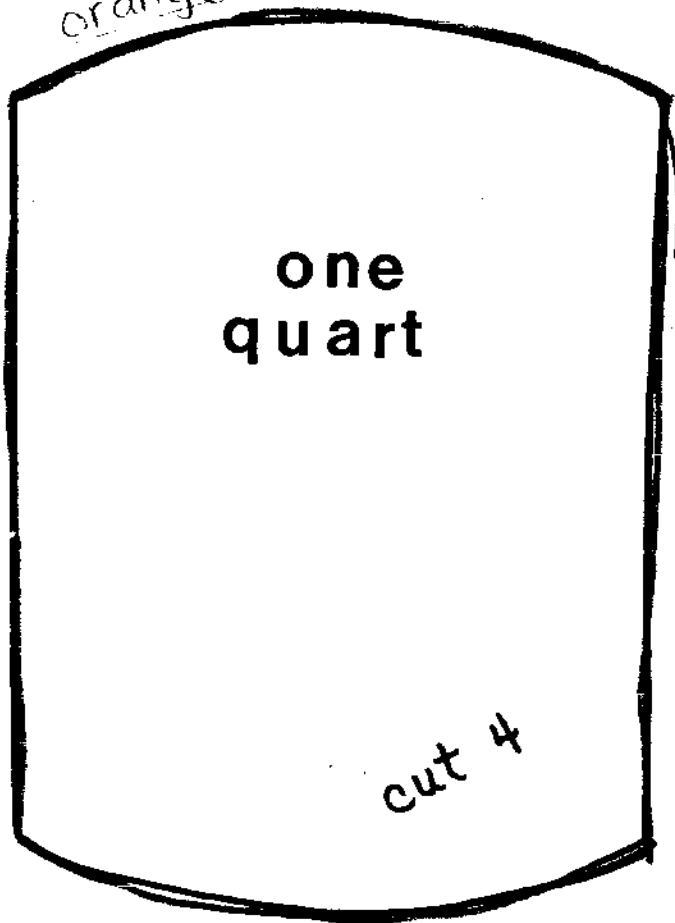

Use the following patterns to cut several cardboard ones. Students may use the patterns to make their "Measurement Man" of colored construction paper.

This little sketch shows how the "parts" are glued together. The children may add details to his face and body with their crayons to give him a "personality"!!!
